ABOUT ME

I am a computer science student and an enthusiast of new technologies. I like learning new things and taking part in IT conferences and meetups.

SOFT SKILLS

I have a basic knowledge of project management, task planning, and time organization. I am also a good team player and Agile Scrum is part of my daily routine.

JĘZYKI

English (B2)
Polish (Native)

PROJECTS

Poli-Events - Events on Lodz University of Technology
03.2019

- The application allows to publish and search for social events organized by Student Self-Government of TUL.
- I was responsible for planning, coding, and release of application
- Technologies: React, Firebase, SCSS

Pan Cytat App
07-08.2018

- Application with motivational quotes for "Pan Cytat" website. It allows searching for users' favorites quotes and saving them on their devices.
- This project gave me knowledge about how to use NoSQL databases and how to deploy React Native Application.

Node Chat
07.2018

- Basic Chat application created with socket.io and node.js as part of Udemy's course.
- This project gave me a big piece of knowledge about how to create a real-time web application.

EDUCATION

Lodz University of Technology
since 2018, Computer Science

- I've realized the project as part of the Design Thinking course
- I'm a member of IT Commission in TUL's Students Self-government
- I've taken part in "Scrum in Practice" workshops.
- I've taken part in two days "Project Management" workshops on SkillUp 2019 conference.
